Suggested Evidence List for the 12-Month Review

A practical documentation guide from the Dubai Accord

Institutions may use existing evidence rather than creating new documentation solely for the Accord.

1. current AI, academic-integrity, assessment, research and privacy policies
2. sample assessment instructions showing AI permissions and disclosure expectations
3. staff and student AI-literacy resources and participation data
4. academic-integrity case procedures and evidentiary guidance
5. privacy impact assessments, accessibility reviews or procurement evaluations for AI-enabled systems
6. student and staff feedback reports, survey findings or consultation summaries
7. technology inventories, risk registers and records of pilot evaluation
8. examples of assessment redesign and evaluation of learning impact
9. annual review minutes, action plans and documented policy changes

Use existing evidence where possible; the aim is visible, proportionate and well-documented review, not unnecessary paperwork.

This is a practical evidence guide, not a compliance score or certification.
